

## Customer Quality Assurance Intern

Name of Company: FTC Solar

Internship Title: Customer Quality Assurance Intern

Department: ESH&Q

### Responsibilities Overview:

The Customer Quality Assurance Intern will support the Customer Quality Engineering team in documenting best practices for Quality Assurance and Quality Control for Customer-facing processes. In this position, you will experience working with utility scale solar trackers and Engineering, Procurement & Construction (EPC) contractors of power plants. This position will require travel to Customer outdoor construction sites and writing technical documents.

### Required Qualifications:

- Enrolled in technical degree – civil, structural, mechanical, electrical or environmental engineering or similar.
- Desire to learn about renewable energies, particularly solar.
- Understanding of basic Occupational & Health concepts.
- Skilled with MS Office applications, particularly Word, Visio, and PowerPoint.

### Preferred Qualifications:

- Strong communication skills
- Access to personal transport to travel to and from customer outdoor construction sites
- Ability to work in a team environment

**Location:** Austin office, Den-STAC, & project sites

**Hours:** 20-40 hours/week

**Salary:** \$15/hour

*Required materials for application:* Resume & sample(s) of technical writing
