Name of Company: FTC Solar Inc.

Internship Title: Product Management Intern

Department: Product Management

About the Role

At FTC Solar, we are looking for talented self-starters with imagination, creativity and passion. We want individuals who are original thinkers and possess the drive to achieve impactful results. The ideal candidate will have a passion for the renewable energy industry and a desire to be part of a team with goals to change the way the world's energy is produced, distributed, and consumed.

The Product Management team at FTC Solar plays a critical, cross functional role at FTC Solar driving the development, marketing and delivery of FTC Solar's Voyager product. The ability to problem solve, continuously improve our product and processes and lead key product initiatives will be attributes a successful candidate possesses.

Primary Responsibilities

- Product Documentation – Authoring, maintenance and distribution
- Expand database of sold projects (input specifications, cost, margin, etc) and use Tableau to identify trends
- Improve processes and organization of folders / files
- Sales Support – Direct support and training of the sales team to help best represent, sell and inform customer of the value add of the Voyager system

Baseline Qualifications

- Analytical & detail oriented
- Comfort in a startup environment where a certain amount of ambiguity exists
- Working knowledge of other MS Office Suite programs

Location: Remote

Salary: \$15/hour
