

**Name of Company:** Silver Electric and Solar

**Internship Title:** Apprentice Electrician

**Department/Team:** PV Installations

**Job Description and Responsibilities:**

As a solar installer, you will be trained on everything that goes into the execution of a solar project. You will be taught how to lay modes, fix loose panels, adjust wiring circuits, and carry out installation designs. Over the course of the summer, you will have the opportunity to observe residential teams in the field. You do not need to have any knowledge of solar to apply, but you can expect to walk away as a trained solar pv installer, with an apprentice license.

**Required Qualifications:**

- ❖ Ability to lift 75lbs (for extension ladder)
- ❖ Comfortable with heights
- ❖ Ability to carry 40lbs up a ladder

**Preferred Qualifications:**

- ❖ Labor experience
- ❖ Interest in Electrical/Solar work
- ❖ Equipment and workers' insurance will be provided
- ❖ Apprentice Licensed (Silver Electric and Solar will pay for license)

**Reports to:** Jonathan Alaniz, Journeyman Electrician

**Location:** On-site field installations across the Austin area (transportation can be provided from Silver Electric office)

**Hours:** Full-time plus possible overtime with overtime pay

**Salary Range:** Starting at \$16/hour

**Required materials for application:**

- Drivers License/ State ID
- Birth Certificate/ SSN
- *Optional:* Resume and Cover Letter
